

# Remote Patient Monitoring Unlocks More Comprehensive Care for Your Patients

Remote Patient Monitoring (RPM) utilizes wireless device readings to remotely manage chronic patient care, seamlessly enhancing outcomes and simplifying operations. With our fully managed RPM services, Signallamp Health offers advanced monitoring capabilities without the added complexity.

## Proactive Health Monitoring: Engagement and Outcomes

We vigilantly monitor your patients' health trends, addressing issues before they escalate into emergencies. Our continuous, attentive monitoring ensures patients are always engaged with the right care at the right time, improving outcomes and lowering total cost of care.

# From Setup to Success: Your All-in-One RPM Service Provider

## Simple Technology

Designed with patients in mind, our devices are easy to operate, ensuring that monitoring high-risk patients is reliable and hassle-free. We supply and manage a full range of essential medical devices. From blood pressure cuffs and glucose monitors to digital scales and beyond.

## Proven Scalability

Our model ensures clinical integration of RPM within your primary care practices, with patient engagement rates of 90%+, making your RPM program sustainable and profitable.

## Complete Management

From enrollment and consent to documentation and compliance, we handle the intricacies so you can focus on what you do best—caring for patients.

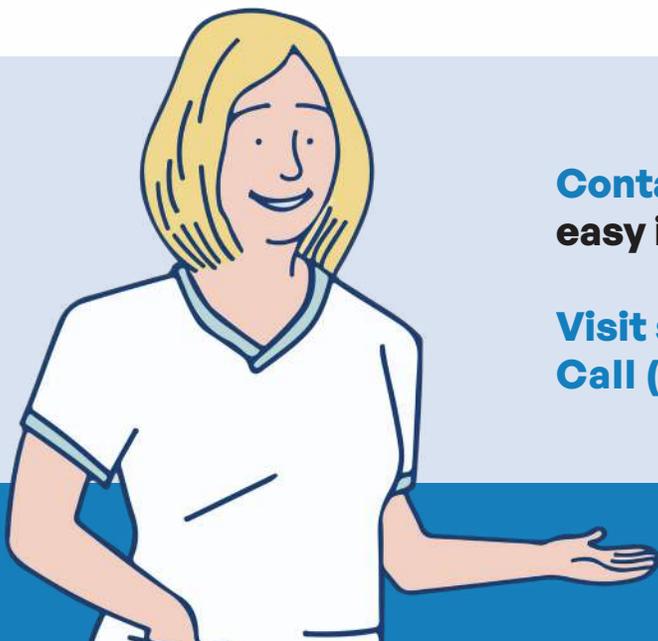

## Financial Upside

Not only does our RPM service increase productivity and open new revenue streams, but it also does so without the need to expand your staff.

## Stress-Free RPM: Expert Data Curation Direct to Your EMR

We continuously trend and analyze RPM data, cleaning any inaccuracies and addressing out-of-bounds readings directly with the patient. This ensures that our nurses input only curated, accurate information directly into your EMR—eliminating the need for complex integrations.

You receive polished, precise data and your providers only need to be involved when patient interventions are required. It's simple, effective, and efficient.
